**SUNDAY  
JUNE 9, 1968**

**2 MILE COURSE (APPROX.)  
ASPHALT 100' - 40'**

**THE COURSE**

## WELCOME

You've bought your ticket, parked your car, and stepped up to the snow fence. If you've been on the scene before you know what's going on, if it's the first time there's probably some confusion in your mind about all the furious activity and the long waits when nothing seems to happen. What's happening is a road race.

No doubt as soon as one finished building the first road, another came along wanting to see how fast he could go. The end result was a loud, smelly, sometimes beautiful thing called car. And then . . . . . racing.

All of you at one time or another has undoubtedly gripped the steering wheel a bit tighter and said "Lets see how fast we can get there". Today you see the culmination of that thought . . . . a road race. The San Francisco Region of the Sports Car Club of America would like to show and tell you about our sport.

## RUDY'S BODY SHOP

STRAIGHTEN FRAMES

ALL WORK GUARANTEED FIRST CLASS

31 BAY STREET SAN RAFAEL, CALIF. 456-6363

### COVER ART by:

Dennis Dierks  
San Francisco Academy of Art

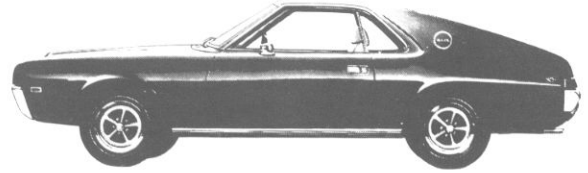

### "PHOENIX ROYALTY"

Reigning as queen of the "Phoenix", Miss Vickie Eidell obviously enjoys her weekend role. A native San Franciscan, the lovely and delightful Vickie places road racing high on her list of many interests, which include water and snow skiing, horsemanship, and occasional modeling. The pert Miss Eidell, a senior at Monterey's Santa Catalina School, intends to enroll at a major Western University after her recent graduation and assures us that she'll be around to brighten many more race weekends.

The car featured is the latest 810 Cord manufactured by SAMCO. It has a Ford 302CID mill, unlike earlier models it does not have fwd but has 3-speed Fordomatic with positraction.

The car was loaned courtesy of LESLIE MOTORS, 999 Del Monte Boulevard, Monterey, Calif.

# The new AMX. What is it?

This year, American Motors is producing only 10,000 AMX's.

Naturally prompting the question, "10,000" what?"

The AMX is a real American sports car.

Which is a lot like an expensive foreign sports car, except not expensive and not foreign.

Does that answer the question?

4917 East 14th St.  
Oakland, Calif.  
569-5069 261-2387

This race is sanctioned by the Sports Car Club of America and is organized and conducted by the San Francisco Region of the Sports Car Club of America. If you would like information on membership in the SCCA, please fill out the coupon and mail to the address shown. The San Francisco Region, SCCA, has published a booklet entitled "Road Racing Today" which describes the various classes and categories of road racing and describes the steps to be taken in order to obtain a competition license. Its cost is \$1.00 (plus 5% tax for California residents).

# DATSUN WINS AT DAYTONA!

**Datsun is now Class F National Champion! Finished 1st & 3rd at SCCA Road Race of Champions, Nov. 25!**

No wonder Road & Track Magazine says "More for the money than any other sports car in its class!" And they're so right. The Datsun 1600 was '67 Divisional Champion in five regions. It's a winner on the highway, too. Datsun is the "complete one." Delivered to you fully-equipped with over \$300 in no-cost extras, including: Radio, Electric Clock, Heater & Defroster. Large Dial Tach. Lockable Center Console. Whitewalls, etc.

A value-packed beauty. Powered by race-proven 96 h.p. dual carb engine. All synchro 4-speed. Safety front disc brakes. Also see the entire Datsun line. Sedan, Sports Cars (1600 & 2000), Wagon, Pickup

SPECIAL CARE FOR RACE CARS & DRIVERS

1815 SANTA ROSA AVENUE

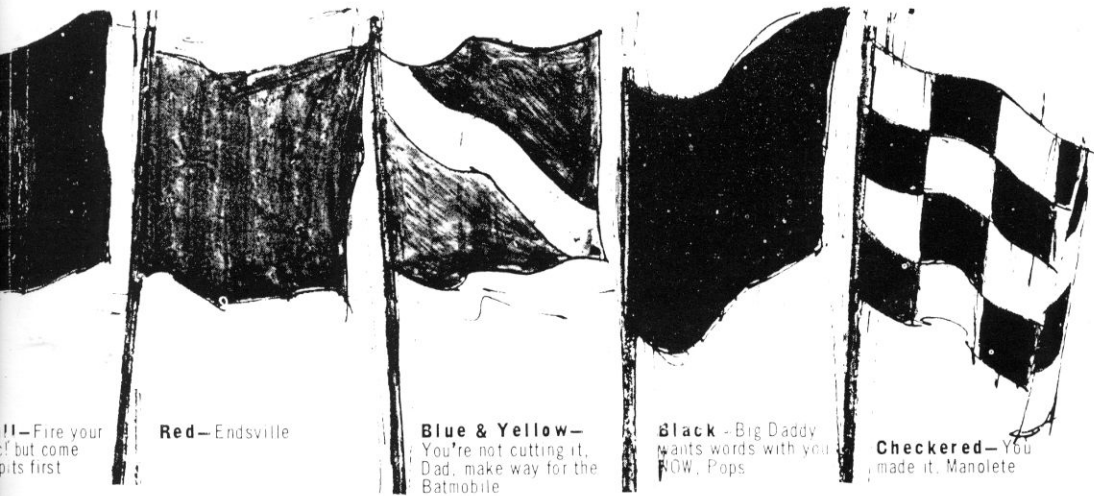

(707) 542-3472

What's happening is the San Francisco Region of the Sports Car Club of America at work and play: the drivers, announcers, officials, starters, timers, cornerworkers, pit crews, firemen, and a host of others. And for every hour you see them at the track another 10 has been spent making this day come into being.

Why do we need this big organization to go road racing? What do you need besides a car and a road? Nothing at all if all you have in mind is speed, no obstacles and little satisfaction except driving fast in a straight line. But the essence of road racing is the knowledge of one's own ability to master car and road and be better at it than anyone else on the road. Since you are here you will appreciate the steps taken to preserve and further the goals of this sport. Here are the things that do and must happen; 1. On every turn on the race course today, and there are six of them, there will be found a Turn Marshal - he is the fellow in the black and white striped jacket, who has command of the turn under the direction of the Chief Steward of the race; he is assisted by several flagman, trained firemen equipped with the most modern, gasoline firefighting equipment, and a communications team that is linked up with every other turn on the course and race control with a positive, wire, communications system.

2. At Race Control, which is located at the Start/Finish line you will find the Chief Steward and the Chief Starter through whom the Chief Steward relays messages to the drivers when in practice or competition by means of flags. In tight proximity is Emergency Central with an extensively equipped Emergency Central Unit. This is a Dodge pickup truck donated to the San Francisco Region, SCCA, by the Northern California Dodge Dealers Advertising Association. It carries the very latest in medical, forced entry and firefighting equipment including a heavy duty Purple K extinguisher unit. This emergency truck carries on-board at all times a physician trained in traumatic, firemen and personnel experienced in fire entry and rescue. You may note that the entry men are suited in asbestos and aluminum suits. We hope that you do not see this unit in action. Also located at the Emergency Control location are regular fire equipment, tow trucks, ambulance and standby physicians.

3. All drivers are required to wear driving suits that effectively cover the body from the neck to the ankles and wrists manufactured of fire resistant material approved by the SCCA. Crash helmets must meet SCCA standards as well as their gloves and socks. All mustachioed and/or bearded drivers must wear goggles or face shields. All cars must be equipped and the drivers

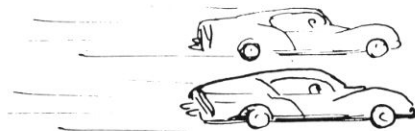

Fire your  
but come  
pts first

Red—Endsville

Blue & Yellow—  
You're not cutting it,  
Dad, make way for the  
Batmobile

Black - Big Daddy  
wants words with you  
NOW, Pops

Checkered—You  
made it, Manolete

## ING OUT THERE

must use seat belts and shoulder harness meeting SCCA standards. In addition to all of this it is highly recommended that drivers equip themselves with underwear of fire resistant material. For all cars there must be either a roll bar or roll cage whose specifications and installation meet with the stringent standards of SCCA. Other requirements such as fire extinguishers, scatter shields, racing tires, fire walls and sometimes safety fuel tanks are explained very well in the San Francisco Sports Car Club of America publication, "Road Racing Today".

4. Every driver on the track today is licensed by SCCA. To get this license you must go through a recognized competition driving school. San Francisco Region holds at least one per year. They are taught by seasoned drivers and other instructors knowledgeable in the art of racing. To maintain their licenses every driver is carefully observed at every race on every corner by Driver Observers, these being drivers who for one reason or another are not racing at that particular time.

In summary to go road racing today, and to preserve road racing as a sport it must be as organized as possible, not only for safety but to get this many people doing all the things they must be doing. The Sports Car Club of America does this. And does it all with almost all volunteers. These volunteers come from all walks of life, work at a variety of professions, have drivers abilities and they are all necessary. Necessary for the communications (almost all women), technical inspectors, registration, flagmen, timing, plus other duties, so many others it would take a page to list them.

It is clearly a labor of love for all concerned. A close examination of the race cars today will indicate the phenomenal number of hours (and \$) our "amateur" drivers and owners put into their cars. Likewise a discerning look at the intricate communications and safety systems which tie this race course together throughout the weekend will give you some idea of the tremendous amount of hours and effort put into the sport by all of us.

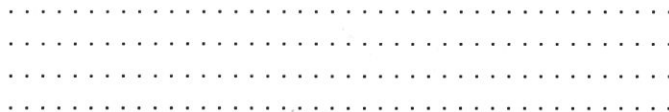

All of this makes up the sport of road racing and by being here today you are joining San Francisco Sports Car Club of America in supporting the world's greatest sports. If you will also share our spirit and enthusiasm you cannot help but have fun and interesting day.

One more thing: Why don't you join us. We'd like to have you and we think you'd like us.

For further information please fill in the coupon on page 7 and we will send you more information on San Francisco Sports Car Club of America and how to belong.

## Rally round the Sonett V-4.

See it now. SAAB's new Sonett V-4—Sweden's idea of an expensive toy. Sonett V-4 is a sports car that is unlike all others. It's a different kind of a sports car because it has true aerodynamic design. So the faster it goes, the easier it is to handle, the tighter it hugs the road. And it has front-wheel drive so you don't skid on curves, on hills, on ice, in rain or snow. Powered by a 4-cycle, V-4 engine, Sonett V-4 has so much pull you can go from zero to 50 in 9.1 seconds. Do well over 100, flat out. See it now in our showroom.

**SAAB**

Ask about our new SAAB Leasing Program.

Unusual overseas plan: Free shipment from Sweden to P.O.E. East Coast.

Drive the remarkable new  
**BMW**

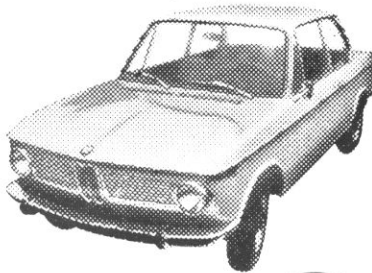

2-door sedan. Only **\$2,658\***!

Just arrived from Germany's famed Bavarian Motor Works!

Speed? Over 100 m.p.h.  
Economy? Up to 30 miles on a gallon of gas.  
Roadability? Unique fully independent suspension on all four wheels for maximum roadholding and safety.

But for the best part of all, go for a test drive today. You'll see why the experts say BMW is your best buy!
