

SACE TECHNICAL PANEL

Technical advisors have three duties: (1) answer questions from the general membership regarding problems they are experiencing with their car; (2) record the questions and answers and transmit them to the Straight Talk editor for publication; and (3) provide assistance in the preparation of a technical guide book.

Every request for assistance will require the requestor and the advisor to jointly complete the form. The advisor will send it to the Straight Talk editor.

Any member wishing to make use of this service may contact the advisors listed. If you write, please use the form and include a stamped, self-addressed envelope. If you phone, have the information ready for the top half of the form before you call.

Be considerate of the time zone differences, and place your call so it is received between 8:00 and 9:00 P.M. for the advisor. If you want the advisor to call you back, be prepared to accept the collect toll. Technical Advisors are:

VALVE COVERS OF LOW HP 1962 CORVETTES

1962 250 hp and 300 hp have steel valve covers. You will note the difference between the correct '62 Corvette covers (on the right) and the 1963 and later. The 1962 steel valve covers are different in two areas. 1) The ends are not as rounded as the later covers and 2) the diamond area on the top of the 327 lettering is not as large as on the later covers.
